- SDLC & STLC concepts
- Agile & Scrum basics (Sprint planning, Backlog, Retrospectives)
- Black Box & White Box Testing (basic knowledge)
- Exploratory & Smoke Testing
- Defect Reporting & Lifecycle
- Test Execution & Metrics

PROFILE

Junior QA Tester with hands-on practice in manual testing and API testing. Skilled in designing and executing test cases, reporting bugs in Jira, and testing APIs with Postman. Knowledgeable in QA methodologies, Agile practices, and defect management. Motivated to contribute to high-quality software in E-commerce and Web3 domains.

PRACTICAL PROJECTS

Opencart – Practice Project

- Designed and executed multiple manual test cases and scenarios in Excel (registration, login, product search, cart, checkout).
- Imported test cases into Jira for execution; documented bugs with detailed steps, expected vs actual results.
- Performed regression testing after updates.

APITesting – Practice Project (reqres.in, dummy.restapiexample, local API server)

- Designed and executed scenarios for GET, POST, PUT, and DELETE requests using Postman.
- Validated response codes and payloads; exported Postman Collection (.json) for documentation.
- Created and tested endpoints on a self-hosted local API server.
